

We work with:

- Accounting Departments
- Public Accounting Firms
- Tax Accounting Firms
- Forensic Accounting Firms
- Bookkeeping Firms
- Auditors
- (and others)

Accounting Firms

An audit reveals the mounting pressure Accounting Firms are experiencing from increasing tax law/regulatory complexity, the effects of workload compression on staff retention, and expanding commoditization of low-end services. (e.g., write up, simpler tax returns, etc.) Datamax's technology portfolio addresses such challenges by lowering costs, automating processes, and improving communication between clients, clerks and principals. **Count on Datamax to maximize the technology that matters!**

Datamax can help you:

- free up time and increase productivity through easy-to-use enhanced accounting-based document workflow solutions,
- improve staff collaboration where common accounting-based documents must be shared to ensure timely audit and reporting,
- reduce the costs of accessing, managing and storing financial accounting records through powerful document management technology and deliver better, faster client service in the process,
- improve accounts payable efficiency by automatically routing invoices to multiple employees for review, approval, and check processing, and
- ensure compliance with evolving regulatory demands; leverage multi-layered IT security strategy to safeguard client financial records.

Through relevant technology advisory and total solution deployment, we help accounting departments/firms "go vertical" by maximizing their workflow processes, communications, and bottom line.

When asked, "how likely would they recommend Datamax to a friend or colleague," our customers have scored us a **9.7** since 2012.

9.7

*Scale: 1-10 (10 being the highest)

Advantages You'll Realize.

Document/Client Security

Utilize advanced security and forensic tools—identifying the who, what, when and where of any documented accounting activity. From job overwrite to hard disk drive encryption and lock, leverage robust MFP functionality to protect accounting records and Personal Identifiable Information (PII).

Regulatory Compliance

Simplify compliance with PCAOB, Sarbanes-Oxley and Gramm-Leach-Bliley Acts and other federal, state and local statutes. Leverage IT tools and capabilities to ensure successful audits and to avoid costly penalties.

Workflow Management

Improve overall firm productivity and decompress workloads with customized and integrated workflows that combine multiple tasks into single processes. Deliver value-added innovation to your clients through enhanced document distribution and document exchange workflows.

Electronic Image Management

Increase productivity by automatically converting scanned images to editable documents, in multiple file formats, directly from an MFP device.

Print Accounting and Cost Recovery

Identify and allocate printing usage related to internal departments, jobs or projects. This is beneficial for accurate client chargeback or cost assignment.

Services We Offer.

Unified Communications as a Service (UCaaS)

Datamax's UCaaS unifies accounting-related channels for communicating and conducting business - phone system, team chat and messaging, video conferencing, file collaboration and more - under one manageable, reliable, and secure platform.

Network Management

Leverage comprehensive network services featuring **TechCare**® Managed IT Services, Cloud Services, Information Security Services, and **TechCare**® **University** User Training for IT specific initiatives—all supported by 24/7 **TechView**® remote help desk support.

Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare**™. All supported 24/7 by **PrintView**™—remote access for printing and connectivity.
