# Architecture (AEC) Firms

Architectural, Engineering and Construction (AEC) firms frequently express to us the following challenges: How can technology help us improve the collaborative design process, accelerate project completion and free up time to pursue more project engagements. Datamax's technology portfolio addresses such challenges by lowering costs, automating processes, and improving communication between designers, engineers, principals, and clients. **Count on Datamax to maximize the technology that matters!**

## Datamax can help you:

- enhance collaboration and speed up project completion through easy-to-use document and imaging workflow solutions,
- protect intellectual property, such as files, drawings, models and contracts, residing in the digital space, with a multi-layered IT security strategy,
- enhance project with accurately printed color technical documents; accentuate collaboration by sharing and printing documents in and from the cloud,
- automate review and approval processes for plans, specifications, proposals, engineering drawings and other document types, and
- manage vendor invoice and project change order processing more efficiently to take advantage of early payment discounts.

.....  
Through relevant technology advisory and total solution deployment, we help architecture-related businesses "go vertical" by maximizing their workflow processes, communications, and bottom line.  
.....

creating  
raving fans™

When asked, "how likely would they recommend Datamax to a friend or colleague," our customers have scored us a **9.7** since 2012.

# 9.7

*Scale: 1-10 (10 being the highest)

## Advantages You'll Realize.

### Enterprise Content Management

Leverage powerful data capture tools to process varied types of content—including e-mails, scanned time-cards, E-sized drawings and digital photographs—into a secure single, standardized/managed system, configurable to the needs and uses of each project.

### Workflow Management

Improve productivity and reduce time with customized and integrated workflows that combine multiple tasks into single processes. Accelerate design approvals and minimize delays with workflow automation, distributed capture and other business process optimizations.

### Wide Format/Graphics Color Printing

Utilize high quality wide-format and color print systems to produce proposals, art renderings and marketing pieces to help meet critical deadlines and enhance project presentation effectiveness—all in-house.

### Mobile Printing

Offer designers and project managers the power to print and scan 24/7 on any networked MFP from any location with wireless communications. Access and print emails, project reports, renderings and more.

### Project Accounting

Leverage MFP account-tracking functions to assign costs to projects or departments with device level, integrated cost accounting systems.

## Services We Offer.

### Unified Communications as a Service (UCaaS)

Datamax's UCaaS unifies AEC-related channels for communicating and conducting business - phone system, team chat and messaging, video conferencing, file collaboration and more - under one manageable, reliable, and secure platform.

### Network Management

Leverage comprehensive network services featuring **TechCare®** Managed IT Services, Cloud Services, Information Security Services, and **TechCare® University** User Training for IT specific initiatives—all supported by 24/7 **TechView®** remote help desk support.

### Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare™**. All supported 24/7 by **PrintView™**—remote access for printing and connectivity.
