Through relevant technology advisory and total solution deployment, we help architecture-related businesses “go vertical” by maximizing their workflow processes, communications, and bottom line.

Architectural, Engineering and Construction (AEC) firms frequently express to us the following challenges: How can technology help us improve the collaborative design process, accelerate project completion and free up time to pursue more project engagements. Datamax’s technology portfolio addresses such challenges by lowering costs, automating processes, and improving communication between designers, engineers, principals, and clients. Count on Datamax to maximize the technology that matters!

Datamax can help you:
- enhance collaboration and speed up project completion through easy-to-use document and imaging workflow solutions,
- protect intellectual property, such as files, drawings, models and contracts, residing in the digital space, with a multi-layered IT security strategy,
- enhance project with accurately printed color technical documents; accentuate collaboration by sharing and printing documents in and from the cloud,
- automate review and approval processes for plans, specifications, proposals, engineering drawings and other document types, and
- manage vendor invoice and project change order processing more efficiently to take advantage of early payment discounts.

We work with:
- Landscape Architects
- Architecture Firms
- Engineering Firms
- Construction Firms
- Drafting Services
  (and others)
Advantages You’ll Realize.

Enterprise Content Management
Leverage powerful data capture tools to process varied types of content—including e-mails, scanned time-cards, E-sized drawings and digital photographs—into a secure single, standardized/managed system, configurable to the needs and uses of each project.

Workflow Management
Improve productivity and reduce time with customized and integrated workflows that combine multiple tasks into single processes. Accelerate design approvals and minimize delays with workflow automation, distributed capture and other business process optimizations.

Wide Format/Graphics Color Printing
Utilize high quality wide-format and color print systems to produce proposals, art renderings and marketing pieces to help meet critical deadlines and enhance project presentation effectiveness—all in-house.

Mobile Printing
Offer designers and project managers the power to print and scan 24/7 on any networked MFP from any location with wireless communications. Access and print emails, project reports, renderings and more.

Project Accounting
Leverage MFP account-tracking functions to assign costs to projects or departments with device level, integrated cost accounting systems.

Services We Offer.

Unified Communications as a Service (UCaaS)
Datamax’s UCaaS unifies AEC-related channels for communicating and conducting business - phone system, team chat and messaging, video conferencing, file collaboration and more - under one manageable, reliable, and secure platform.

Network Management
Leverage comprehensive network services featuring TechCare® Managed IT Services, Cloud Services, Information Security Services, and TechCare® University User Training for IT specific initiatives—all supported by 24/7 TechView® remote help desk support.

Print Management
Optimize your print output through best-in-class print technology and the industry’s most responsive approach to managed print services—PrintCare™. All supported 24/7 by PrintView™—remote access for printing and connectivity.
