

We work with:

.....
Exploration & Production
Drilling & Well Services
Oilfield Services
Pipeline Services
Natural Gas Suppliers
(and others)

Energy Oil & Gas

World-wide economic unrest, emerging ransomware threats, and dizzying price swings have energy oil & gas providers aggressively exploring better ways to improve and control mission-critical processes. Our technology portfolio addresses such challenges by lowering costs, automating workflows, and improving communication between landmen, engineers, stakeholders, and regulatory agencies. **Count on Datamax to maximize the technology that matters!**

Datamax can help you:

- enable landmen and engineers to work faster and smarter with instant access to land files while in the field,
- reduce go-to-market delivery times by speeding up the process for document modification, approval, notification, and distribution,
- leverage instant access to information in order to optimize oil & gas operating portfolios and ensure stakeholder/investor satisfaction,
- centrally manage all business-related files including land documents, well files, pipeline records, lease records, offshore assets, inspection records, standard operating procedures (SOP) and others, and
- securely and quickly exchange information to satisfy compliance and reporting requirements such as found with Federal Energy Regulation Commission (FERC) and the Environmental Protection Agency (EPA).

.....
Through relevant technology advisory and total solution deployment, we help energy oil & gas providers “go vertical” by maximizing their business processes, communications, and bottom line.

Advantages You'll Realize.

Enterprise Content Management

Assemble, manage and access the wide variety of energy-related content and documentation (i.e. production reports, well records, surveys and plats, geo prognoses, email, etc...) to significantly improve operations.

Workflow Management

Deploy document workflow technology to help reduce risk by increasing control and streamlining document processes, ensuring compliance with ISO quality and environmental management standards.

Network Security

With newer hardware and software control systems on site, the number of oilfield network entryways has increased exponentially. Deploy a cloud-based network security strategy with multi-layered protection.

Mobile Printing

Offer landmen, engineers, and internal personnel the freedom to print and scan 24/7 on any networked MFP from any location with secure wireless communications.

Cost Reduction and Management

Eliminate expensive pre-printed forms, minimize the need for multiple fax lines, and control print costs through enforceable print policies.

Services We Offer.

Unified Communications as a Service (UCaaS)

Datamax's UCaaS unifies energy-related channels for communicating and conducting business - phone system, team chat and messaging, video conferencing, file collaboration and more - under one manageable, reliable, and secure platform.

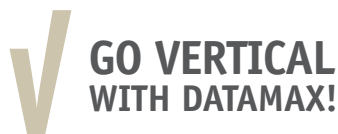

Network Management

Leverage comprehensive network services featuring **TechCare**® Managed IT Services, Cloud Services, Information Security Services, and **TechCare**® **University** User Training for IT specific initiatives—all supported by 24/7 **TechView**® remote help desk support.

Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare**™. All supported 24/7 by **PrintView**™—remote access for printing and connectivity.
