goVertical.[®] healthcare

Dental Services

Attracting new patients, increasing case acceptance, and improving case production has today's dentists fighting tooth and nail to succeed. Our technology portfolio addresses such challenges by lowering costs, automating processes, and improving communication between doctors, staff, lab technicians and patients. We provide the freedom to focus on growing the practice—not just administering it. ***Count on Datamax to maximize the technology that matters!***

Datamax can help you:

- easily transmit x-rays, periodontal charts, EOBs, narratives or any other documentation required by a health plan to process and settle dental claims more quickly,
- manage patient records through authentication, encryption and other solutions to address HIPAA-mandated compliance.
- simplify admissions and new-patient exam workflows to improve staff productivity and reduce patient wait times,
- streamline your EHR experience through seamless HL7 scanning integration—reducing the steps required to scan and index documents to a patient's record, and
- leverage the latest copier/MFP security measures to securely present, share and access treatment plans with colleagues, partners, and patients from anywhere; increase the speed and quality of dental care delivery.

Through relevant technology advisory and total solution deployment, we help dental health providers "go vertical" by maximizing their business processes, communications, and bottom line.

creating
raving fans[™]

When asked, "how likely would they recommend Datamax to a friend or colleague," our customers have scored us a **9.7** since 2012.

9.7

Advantages You'll Realize.

Workflow Management

Increase staff productivity, reduce stress and improve overall practice operation with customized and integrated workflows that combine multiple tasks into single processes.

Content Management

Combine control with flexibility to centrally and securely manage and access all practice-related content—providing a critical complement to HIS, EHR and other clinical and back-office applications.

Privacy and Security Management

Deploy privacy and security solutions and services developed specifically to comply with the many regulatory requirements established by HIPAA and HITECH.

Achieving Meaningful Use

Adopt electronic health records (EHRs) to meet Meaningful Use requirements for improving patient care to qualify for incentives (*projected in the billions*) available under the HITECH Act.

Business Communications

Eliminate expensive pre-printed dental/medical forms, reduce postage costs, and minimize administrative overhead with document distribution technologies that enhance the speed and quality of communications.

Services We Offer.

Unified Communications as a Service (UCaaS)

Datamax's UCaaS unifies dental-related channels for communicating and conducting business - phone system, team chat and messaging, video conferencing, file collaboration and more - under one manageable, reliable, and secure platform.

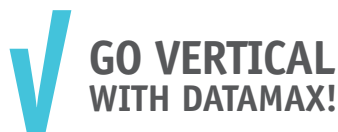

Network Management

Leverage comprehensive network services featuring **TechCare**® Managed IT Services, Cloud Services, Information Security Services, and **TechCare**® **University** User Training for IT specific initiatives—all supported by 24/7 **TechView**® remote help desk support.

Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare**™. All supported 24/7 by **PrintView**™—remote access for printing and connectivity.
