

HOW TO PROTECT YOUR BUSINESS DATA LIKE YOU PROTECT YOUR HOME

We protect our homes with security features to control access and safeguard valuables—and your multifunction printers should help you do the same. The latest Canon imageRUNNER ADVANCE line incorporates an extensive set of security features to help you keep your data safe.

ALARM SYSTEM

Peace of mind that property is secure.

VERIFY SYSTEM AT STARTUP

Identifies tampering of boot code, OS/firmware, and MEAP applications.

ALARM COMPANY

Remote monitoring and notifications of potential threats.

SIEM SYSTEM INTEGRATION

Integrates with third-party SIEM systems to alert network administrators of potential threats.

CAMERA SYSTEM

Real-time activity visibility.

imageWARE ENTERPRISE MANAGEMENT CONSOLE (EMC)

Provides the ability to monitor device status and streamline security settings.

SAFE

Safeguards valuable assets.

DATA ENCRYPTION

Encodes data to help prevent unauthorized access.

McAfee
PROTECTED

GUARD DOG

Protects against unexpected threats.

McAfee EMBEDDED CONTROL

Utilizes whitelisting to help prevent the execution of malware as well as tampering of firmware and applications.

PAPER SHREDDER

Guards against confidential information getting into the wrong hands.

HDD DATA ERASE

Deletes job data after each task via overwriting process.

SMART LOCK

Grants access only via key or passcode.

DEVICE AUTHENTICATION

Requires users to verify their identity to gain device access.
